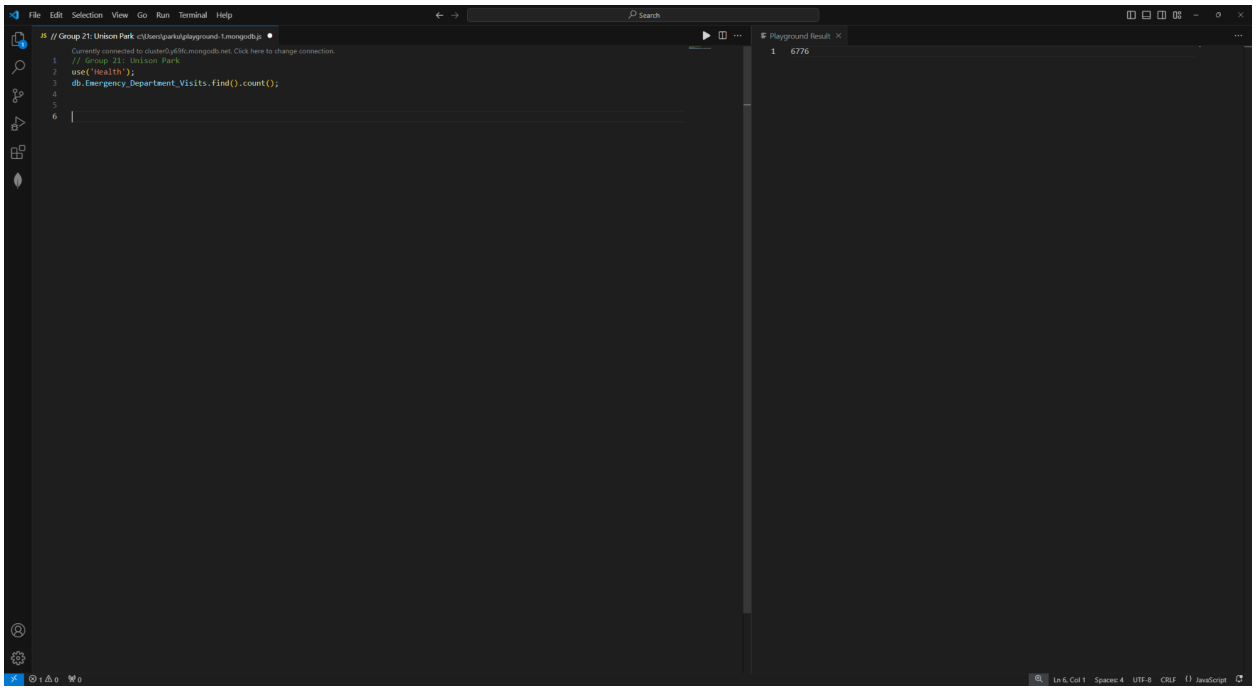
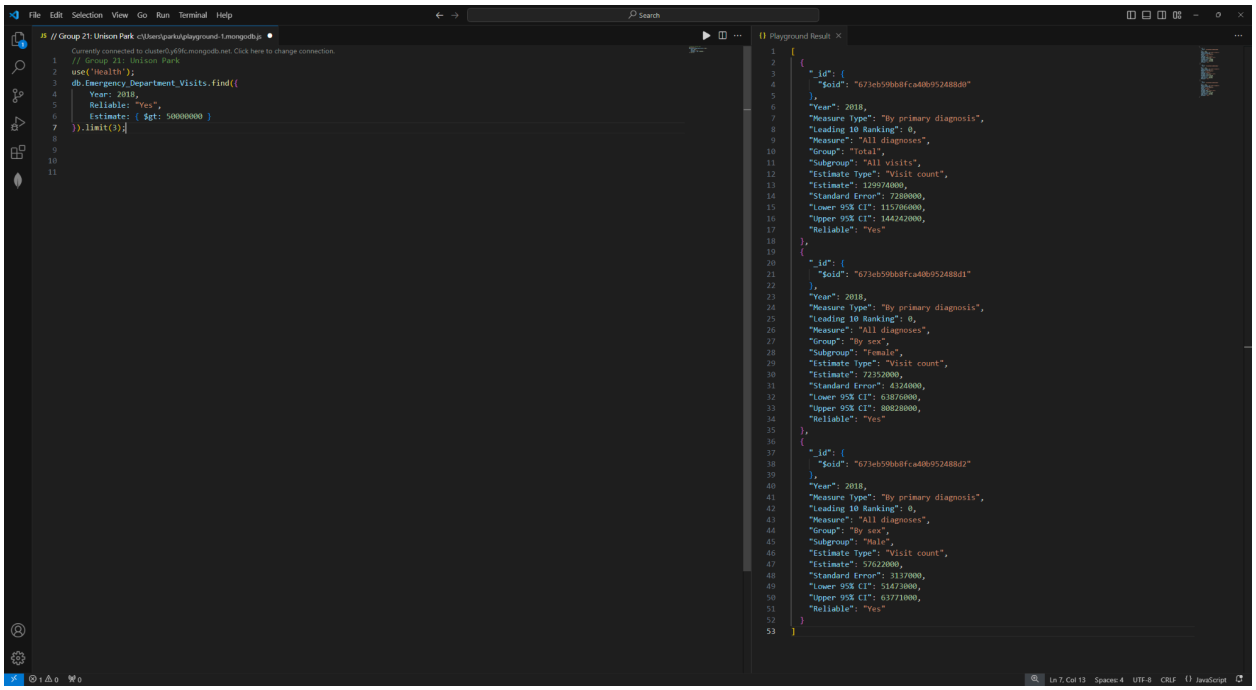
Deliverable 4: Final Project_Unison Park_Group 21

Deliverable 4.1: Provide documentation of the queries and the results with screenshots in a PDF document (include Group Number and Team member names).

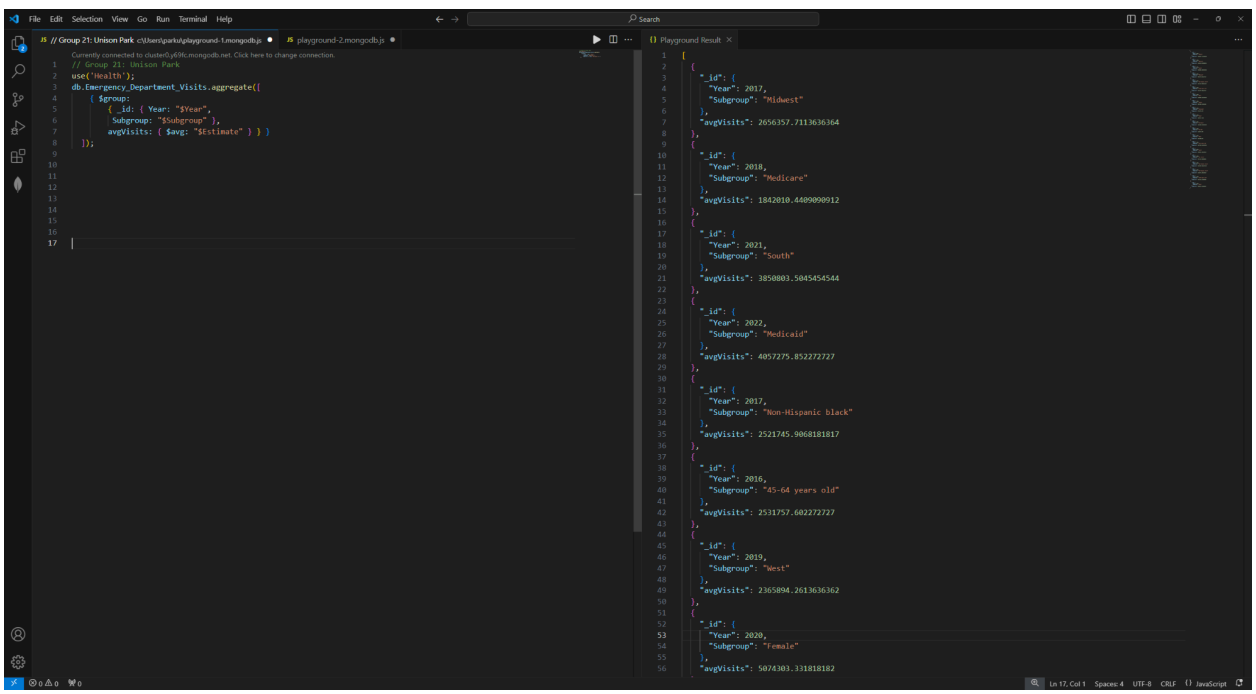
1. Write a MongoDB query to display the total number of documents in the collection Emergency_Department_Visits **(Collection)**



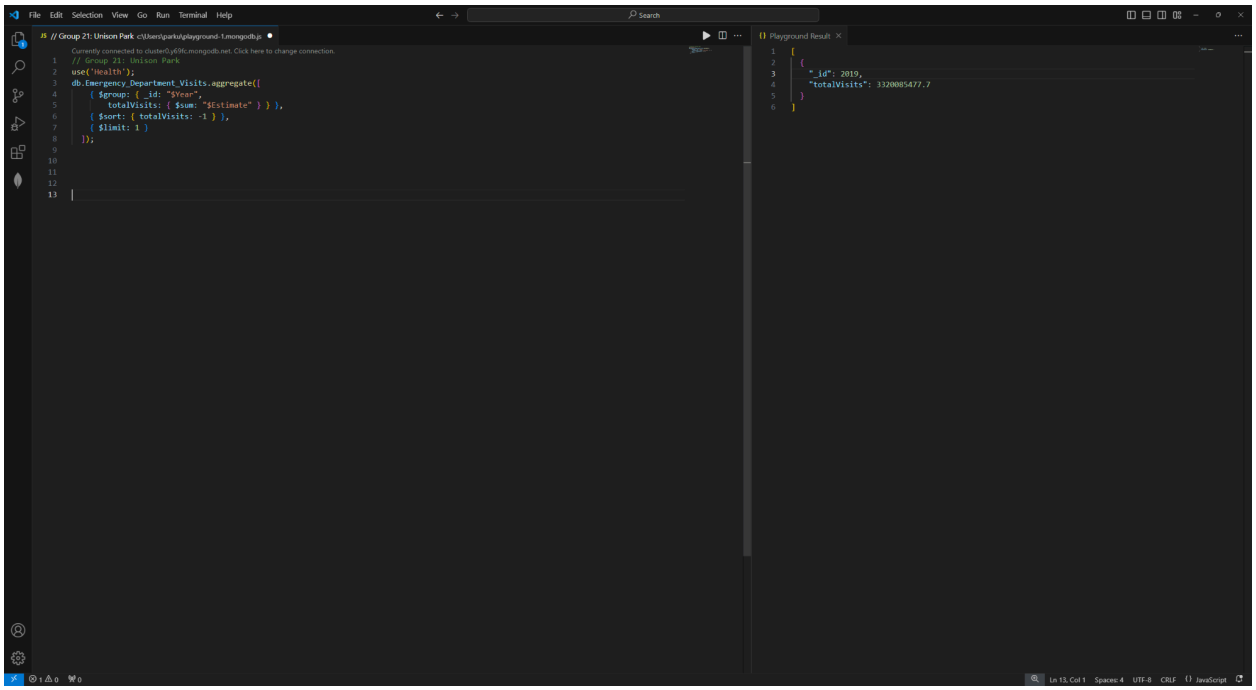
2. Write a MongoDB query displaying any 3 visits that are reliable and have an estimate above 50 million for the year 2018. **($AND/$ALL)**



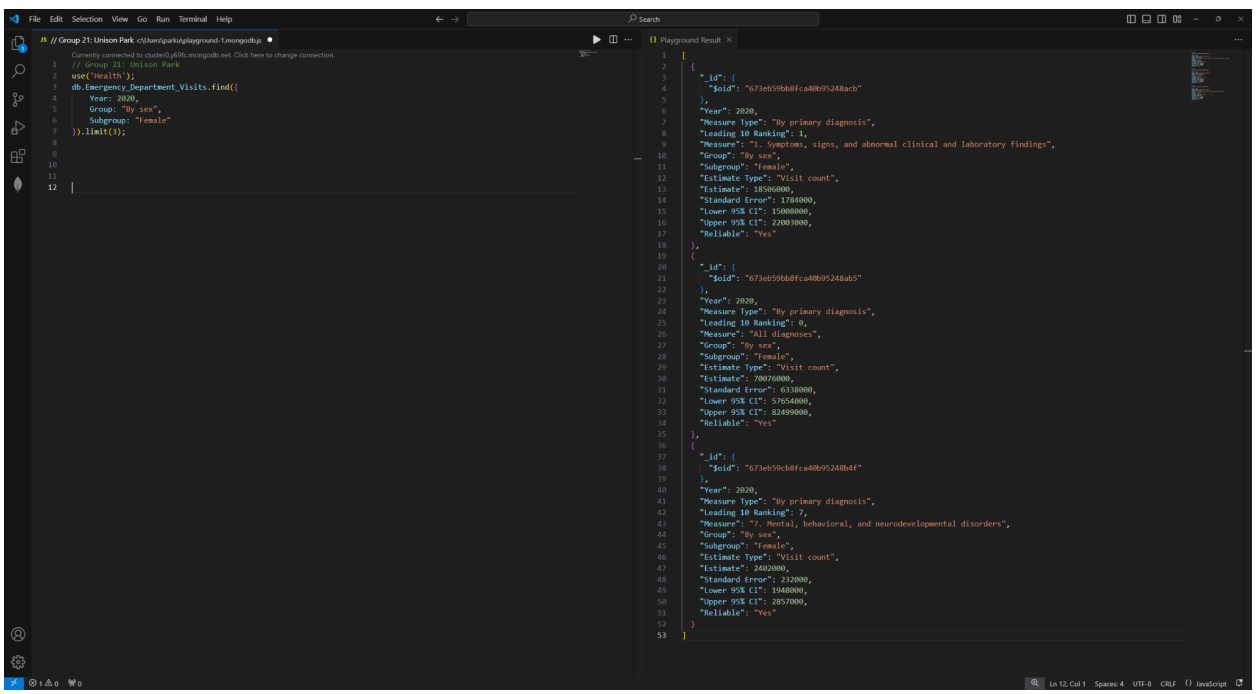
3. Write a MongoDB query to display the average number of visit estimates for each year grouped by subgroup **(Aggregation)**



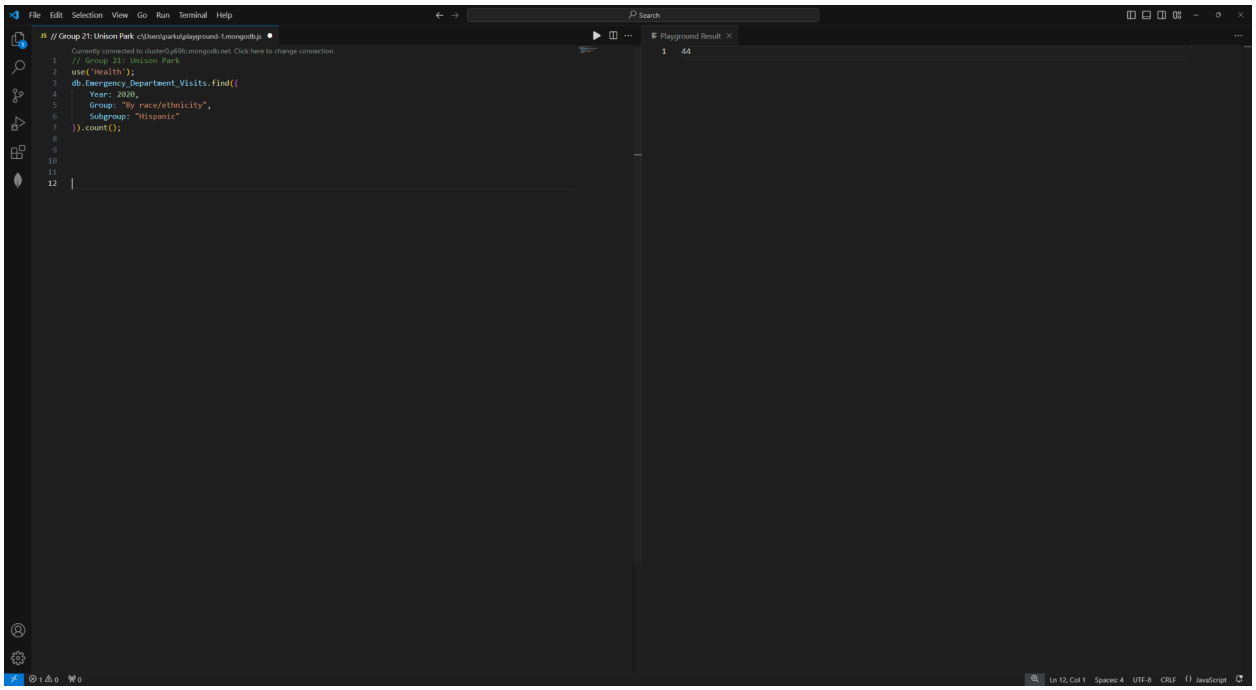
4. Write a MongoDB query to display the year with the highest total visits **(Nested)**



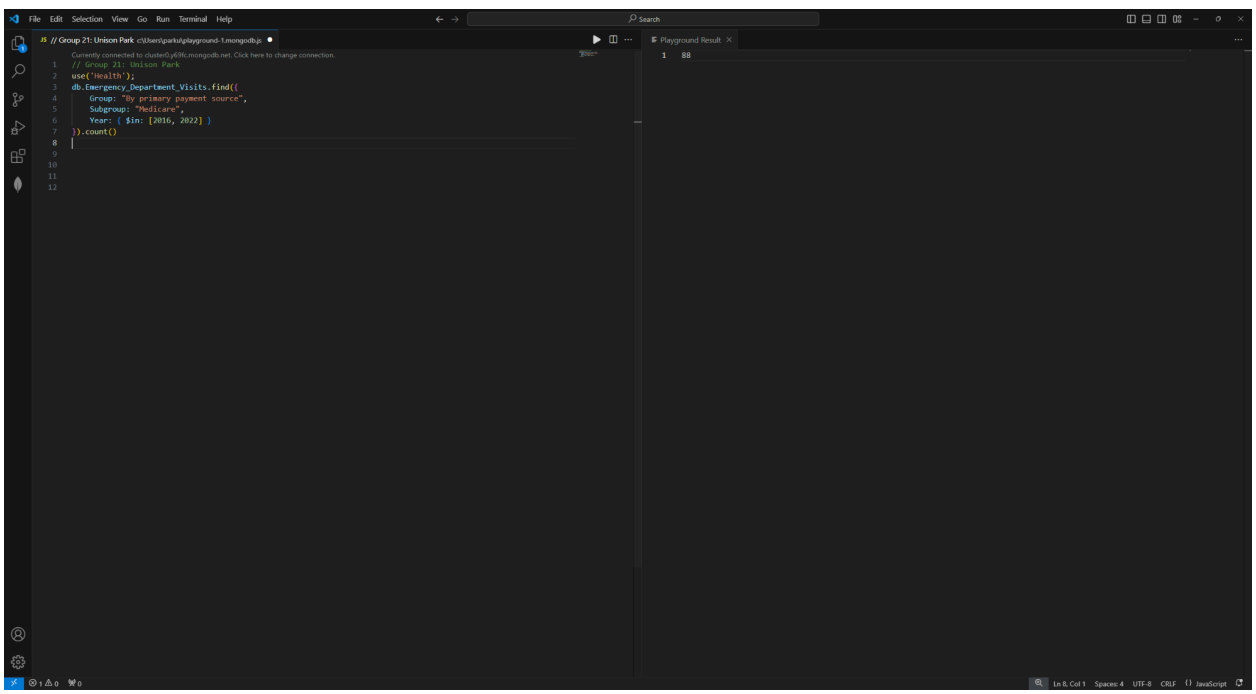
5. Write a MongoDB query that displays any 3 documents for “Female” in 2020. **(Collection)**



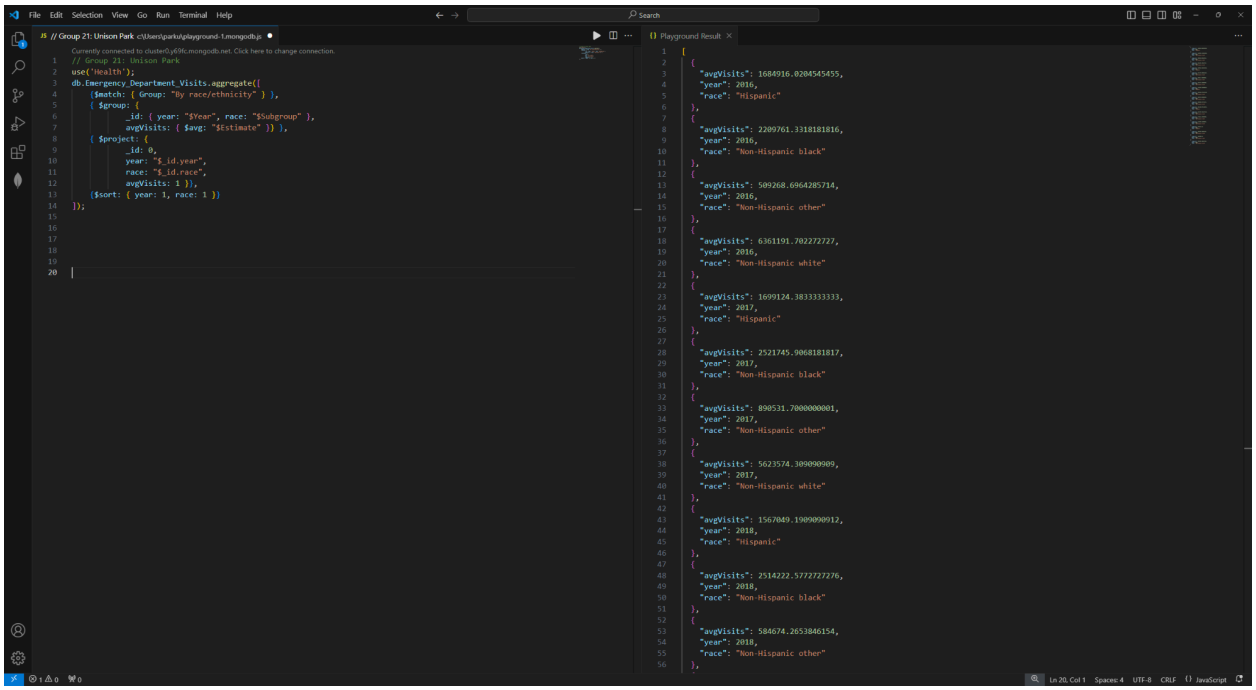
6. Write a Mongodb query to display the total number of documents for hispanics in 2020. **(Collection)**



7. Write a MongoDb query displaying the total document of medicare primary payment source in 2016 and 2022. **(Collection)**



8. Write a MongoDb query displaying the average number of emergency department visits by race/ethnicity for each year. **(Aggregation)**



Deliverable 4.2: Create a dashboard using Atlas for data visualization and exploration that applies to the use case(s). Share the dashboard with plthomps@charlotte.edu and our TA. Include the link and screenshots in the PDF document
